

The radio station, Airl, is vital to the community. Their style of Christian music is not widely heard in the country, much less in the Las Vegas area. Airl has been a blessing to me and my family. We love this station not only for it's music, but also bringing community needs to the attention of it's listeners. Their advertising of the Rescue Missions all over the country have encouraged so many to volunteer there. I work with church groups who want to come to Vegas for mission opportunities, and one of the places people ask to serve in is the local homeless shelters. I believe this is a direct correlation to the needs being brought to people's attention. If Airl is taken off the air in Las Vegas and surrounding communities, it would not only effect the variety of music heard but also the local shelters in not having their needs met. Please don't take our radio station off air! thank you for hearing our comments!
